

Syed Mohideen Afridi

Chennai, Tamil Nadu, India | +91 63698 91971 | syedafridi0024@gmail.com

PROFESSIONAL SUMMARY

Results-driven **Software Engineer** with **3+ years of experience** building scalable web platforms, resilient microservices, and intelligent workflow automation systems. Proven track record in taking **end-to-end task ownership** in agile environments, collaborating closely with engineering leadership and cross-functional teams to streamline workflows and drive technical innovation. Core background spans *full-stack development* with **React.js, Django, and Node.js**, engineering *embeddable AI chatbot SDKs*, implementing application-side *Multi-Factor Authentication (MFA)*, and developing *poly-cloud integration utilities* to ensure cross-cloud portability. Hands-on in supporting containerized deployment workflows with **Docker, Helm, and ArgoCD**. Extensively leverages *AI-assisted development tools* as a pragmatic engineering aid to accelerate delivery velocity, optimize code paths, and deliver maintainable, production-ready software.

TECHNICAL SKILLS

LANGUAGES	JavaScript (ES6+), Python, Java (Basics), C++, SQL, Bash/Shell
FRONTEND STACK	React.js, Next.js, Redux, Redux Toolkit, React Flow, Konva.js, Chart.js, HTML5, CSS3, SCSS, WebSockets
BACKEND & APIS	Django, Django REST Framework, Node.js, Express.js, FastAPI, RESTful APIs, Apache Kafka (Basics)
AI & AUTOMATION	Embedded Chatbot SDK & CDN Script, AI Agents, LLM Integrations, AI-Assisted Development, Intelligent Document Processing (IDP)
CLOUD & DEVOPS	Kubernetes, Helm Charts, ArgoCD, Docker, Poly-Cloud Utilities, Config Repositories, CI/CD, Linux
SECURITY & AUTH	Multi-Factor Authentication (MFA), Vulnerability Remediation (Cyraax Scans), HSTS, Scoped Cookies, CORS & CSRF
DATABASES & TOOLS	PostgreSQL, MySQL, Redis, Pandas, Git, GitHub Actions, Jira, Postman, Vite, Webpack

WORK EXPERIENCE

M2P Fintech | Software Development Engineer I (SDE-1) Mar 2025 – Present

- Application-Side MFA Planning & Integration:** Proposed and implemented a structured plan for the application-side Multi-Factor Authentication (MFA) feature on the web portal, collaborating closely with the platform team to integrate platform authentication specs smoothly.
- Embedded AI Chatbot SDK & CDN:** Developed an interactive AI Chatbot packaged as an embeddable JavaScript SDK, CDN script, and standalone web application; successfully integrated the widget across internal and partner web pages, including the company's official website.
- Poly-Cloud & Cloud-Agnostic Utilities:** Engineered application-side wrappers and integration utilities for poly-cloud infrastructure, extending cross-cloud portability and enabling seamless multi-cloud operational support.
- Client Deployments & Release Support:** Managed end-to-end production deployments for dedicated enterprise client accounts, ensuring smooth release transitions, configuration verification, and reliable uptime.
- DevOps Support & ArgoCD:** Authored and maintained Kubernetes Helm charts and multi-environment configuration repositories, managing continuous deployment workflows via **ArgoCD**.
- Security Scans & Compliance Fixes:** Addressed and resolved multiple frontend and backend vulnerabilities identified through Cyraax security scans (including HSTS headers, scoped cookie attributes, and CORS policies), assisting the organization in achieving necessary safety standard certificates.
- Task Ownership & Peer Support:** Self-managed daily deliverables working directly under an Associate Director in a fast-paced environment; assisted peers with codebase walkthroughs and architectural context to facilitate smooth team onboarding.
- AI-Assisted Engineering:** Actively involving and adapting AI-assisted development workflows to accelerate delivery velocity, keep up with current industry trends, optimize code paths, and build reliable production-grade software.

Mad Street Den (Vue.ai) | Software Engineering Trainee July 2024 – Feb 2025

- Intelligent Document Processing (IDP):** Contributed to IDP automation features, working on document classification, annotation workflows, and data extraction pipelines for various document formats.
- UI & Accessibility Improvements:** Enhanced UI usability with keyboard navigation, custom scrolling, and shortcut features, significantly improving user workflow efficiency and reducing task turnaround times from **1 hour to 10 minutes**.
- Interactive Workflow Builder:** Improved the workflow orchestration module using **React Flow, Konva.js**, and drag-and-drop components; contributed to the dataset profiling module displaying summaries with **Chart.js**.
- Backend Optimization & Notifications:** Optimized data processing in Django using **Pandas**, reducing backend memory usage; implemented a reliable notification system to keep users informed on long-running tasks.
- Sandbox Isolation Support:** Assisted in isolating code-server environments so instances spin up on targeted page access, helping reduce unnecessary cloud infrastructure usage.
- Agile Leadership & Scrum Facilitation:** Led multiple Scrum ceremonies and sprint syncs in the absence of a dedicated Scrum Master, demonstrating leadership and cross-functional facilitation to keep deliverables on schedule.

- Contributed to building new modules within an existing AI-based web application, enabling eCommerce personalisation and recommendation strategies.
- Webpage Performance Optimization:** Profiled rendering lifecycles and improved webpage loading times through asset optimization, code splitting, and memoization under senior engineers' guidance and help—demonstrating fast learning ability and quick adaptation to complex tasks early in career.
- Bug Resolution & War Rooms:** Actively contributed to high-priority debugging sessions, diagnosing root causes and delivering tested fixes for production edge cases.

- Created quiz modules and structured notes on fundamental Data Structures & Algorithms (Arrays, Linked Lists, Trees, Graphs).
- Solved diverse algorithmic problems to build strong problem-solving and algorithmic fundamentals.

PROJECTS

SUCCOUR TO FARMERS – Smart Farming Platform [\[Project Overview ↗\]](#)

Technologies: React.js, Node.js, Express, Twilio API, MongoDB

- Developed a smart farming platform providing farmers with insights on soil quality, weather conditions, and automated irrigation schedules.
- Integrated automated Twilio SMS alert notifications and built a direct produce marketplace to connect farmers directly with buyers.

DOCINE – Healthcare Application

Technologies: Python, Django, React.js, Scikit-learn, PostgreSQL, REST APIs

- Built a healthcare web application utilizing ML algorithms for early disease detection and symptom analysis with high accuracy.
- Implemented clean role-based dashboards for doctors and patients, displaying medical history, prevention insights, and hospital details.

SIMPLE CHAT APP – Real-Time Messaging Platform [\[Live App ↗\]](#)

Technologies: React.js, Node.js, WebSockets, Express

- Built a real-time messaging application using React, Node.js, and WebSockets, enabling live Room-ID group chats and low-latency message broadcasting.

IPL Stats App – Interactive Cricket Dashboard [\[Live App ↗\]](#)

Technologies: React.js, JavaScript, CSS3, REST APIs

- Built an IPL clone application using React, displaying team profiles, player statistics, and interactive match insight cards.

EDUCATION

B.Tech in Information Technology [\[View Degree Certificate ↗\]](#)

CGPA: 9.03 / 10.00 (First Class with Distinction)

- Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Systems (DBMS), Operating Systems, Computer Networks, Cloud Computing, Internet of Things (IoT), Blockchain Technologies.
- Mentored fellow students in programming concepts and full-stack development; organized technical problem-solving sessions.

CERTIFICATIONS

- Programming in Java:** NPTEL [\[Verify ↗\]](#)
- Problem Solving:** HackerRank [\[Verify ↗\]](#)
- Responsive Web Design:** freeCodeCamp
- JavaScript: The Weird Parts:** Udemy [\[Verify ↗\]](#)
- Machine Learning Onramp:** MathWorks
- Cloud & Container Fundamentals:** Hands-On Learning

ACHIEVEMENTS & ACTIVITIES

- Winner:** 24-Hour Hackathon (CSI, SVCE)
- 1st Place:** Tech-Twisters (St. Joseph's College of Engg.)
- Association of Information Technologists (AIT):** Event participant and peer mentor
- Winner:** Rota-TechX 2023 (24-Hour Hack & Make-a-thon)
- Runner-Up:** INTERROGATE, CYNAPSE (RMK Engg.)
- National Service Scheme (NSS):** Engaged in community service activities
